Fluorescent Bulb Collection Program

Fluorescent light bulbs are an extremely cost effective and an energy efficient way to light your home or business. There is, however, one drawback; fluorescent bulbs contain mercury vapor. Mercury is a neurotoxin that when released into the environment contaminates our water and the aquatic food chain. This is what has caused the DNR to post fish consumption advisories on every lake in Wisconsin.

To prevent any more damage from being done, Chippewa County has teamed up with local hardware stores and recycling programs to provide a fluorescent bulb collection program. Residents and businesses can bring their used fluorescent bulbs to a convenient location, year round, for recycling at cost effective prices.

Did you know you can take your fluorescent bulbs to:
Chippewa County Clean Sweep - April 1 & October 14: 8 am - Noon

NOTE: The new low-mercury bulbs (or green-tipped bulbs) and compact fluorescent bulbs, CFL, still contain mercury vapors and should be recycled. Landfills have banned ALL fluorescent bulbs.
