

## 900.2 GENERAL SOIL TYPES - CHIPPEWA COUNTY

A general soil map for Chippewa County is located in Page 900-1A. Of the eight types of soil associations, the two that are predominantly found on County Forest Land are the Amery-Santiago and Spencer-Magnor-Almena associations. The Amery-Santiago association is found on deep, gently sloping to very steep, well drained, loamy and silty soils on terminal moraines. The Spencer-Magnor-Almena association is found on deep, nearly level to sloping, moderately well-drained and somewhat poorly drained, silty soils on ground moraines.
